## \$100,000 READY FOR CAPITOL

Oklahoma City, May 24.—One hundred thousand dollars recently voted in a city bond issue and deeds to about 400 acres of land in tracts scattered to the northeast, comprising the so-called Capitol addition, were delivered to Gov. Cruce today by the State Capitol Building Company of Oklahoma City and as soon as possible work on the building is to begin. The site is to be that accepted by the last legislature.

The building company still holds, in escrow, deeds to between 250 and 300 acres of land which is to be purchased outright and delivered to the state as soon as the building company is able to realize upon notes which some donors gave in place of land.

Following delivery of the money and deeds, a contract was executed between Lee Cruce as an individual and the state Capitol building company, through C. F. Colcord, president, whereby the former becomes trustee for the latter and agrees to begin expenditures of the cash as soon as plans may be secured and other preliminaries completed.

It is provided that when the legislature meets Gov. Cruce is to submit the entire transaction to the law-makers for ratification or rejection. If the legislature does the former then the state Capitol Building company is relieved of its obligation to pay to the state \$1,000,000 for the much talked of free capitol building. If not, then the building company and Oklahoma City is loser to the extent of

### Small Blaze This Morning.

A fire alarm was turned in from the residence of Mrs. J. M. Taylor, about 10:15 this morning. A small out house caught from a spark from burn-

ing trash and had it not been for the prompt response of the fire department serious damage might have resulted as a high wind was blowing. The small shed was burned almost to the ground.

In Memory of Queen Victoria, Ottawa, Ont., May 24.—All Canada today joined in celebrating Victoria Day, which is observed annually in memory and honor of the late Queen Victoria. Military and patriotic exercises were held in all the principal cities, but the chief observance of the holiday as in former years consisted of athletic competitions and sporting events. More than ordinary interests attached to the athletic competitions, as in several instances they were to serve as tryouts for Canadian representatives in the Olympic games at Stockholm this summer.

## MEXICAN REBELS LOSE HEAVILY

City of Mexico, Mexico, May 23.—Details of the battle in and around Rellano which reached President Madero at 7 o'clock tonight placed the number of rebel casualties at between 800 and 1,000 dead and wounded. Part of the artillery which was lost at Rellano in the previous battle was recaptured.

After the artillery battle had been in progress for seventeen hours the enemy began flank movement against the federal right which was opposed by a brigade of infantry aided by batteries of mountain artillery and rapid fire guns. This engagement was entirely outside the Rellano zone and resulted in the complete dispersing of the rebel flank column. A cavalry detachment 1,200 strong finished the combat, carrying out a flanking movement which drove the enemy from their positions.

Gen. Huerta estimated the strength of the rebels at 6,000 to 8,000 men. The fortifications, he said, were technically constructed.

The Associated Press story of the battle was conveyed to President Madero in his bed chamber, he having retired early with a slight attack of rheumatism. He sent back an expression of the gratitude he felt for the day's work of his army and said that in his opinion it meant without doubt an early end of the revolution.

Gen. Huerta reported to the president in a telegram from Rellano at noon today that he had defeated the rebels and was in possession of Rellano. The rebels, he said, were in full retreat northward pursued by his cavalry.

On the other hand press dispatches indicated that the rebel forces were still in possession of their positions at Rellano at 2:30 p. m. It was stated that there had been a lull in the fighting, due to the fact that the federals were falling back in a maneuver for new positions. The battle was at its

height at 11 o'clock this morning.

Gen. Orozco stated early today that three separate attacks by the federals in yesterday's fighting had all resulted in advantages for the rebels who had lost only five killed and three wounded. He said that Cheche Campos had reported the capture of one federal cannon and two machine guns

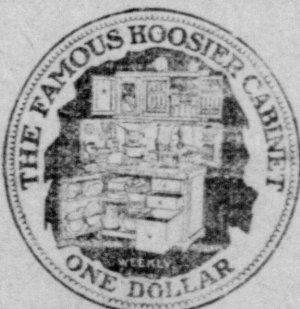

### Canadian Boxing Championships.

Toronto, Ont., May 24.—Amateur fistie stars of all ages and weights have assembled here to compete in the annual boxing championships of the Amateur Athletic Union of Canada. The championships are to be held in the Riverdale Rink, beginning with the elimination events tonight and ending with the finals tomorrow. The tournament this year is the most representative of its kind ever conducted by the Canadian A. A. U., the boxers coming from Vancouver, Calgary and other Western points as well as from all of the principal cities in the East.

\$100,000 cash. In that case deeds to the property are to be returned by the state. In the latter event Gov. Cruce says the building company would still be due its \$100,000 bond to the state, in failure to carry out the first agreement.

The state of Oklahoma will soon begin paying rent for offices here, which, on the present basis, amounts to nearly \$40,000 a year.

Gov. Cruce, as trustee for the building company, deposited the \$100,000 in three Oklahoma City banks and required the purchase of state warrants to that amount.

## USE GAS IN SPORTS

### Too Frequent "Jags" From Oxygen Dangerous.

Proposition of Sir Edwin Ray Lankester Denounced as Unsportsmanlike and Unscientific—Will Shorten Life.

London.—The lay press reports that Sir Edwin Ray Lankester has inquired if the Swedish authorities, who will have charge of the coming Olympian games, will permit a Marathon competitor to carry an oxygen tank or bag and take from it an occasional whiff during that cruel and grueling twenty-six odd miles that must be run by those who would be in at the finish. The competitors, he observes, will presumably be allowed to consume refreshments while racing. "It would be extremely interesting to see whether such breathing is of material assistance to the runner, and as oxygen gas is not a drug, but as natural an article of consumption as water, there seems to be no reason why the runner should be disqualified for refreshing himself with it, as he may with soup or water."

Stimulating drugs are, of course, rightly barred from any athletic contest worthy the name. The Scientific American remarks Oxygen is in these circumstances certainly a drug, inasmuch as it "dopes" the recipient, quite like many another drug. Pure oxygen is a powerful and most valuable stimulant for the sick who require it—patients with coma or pneumonia in extremis. But, as with all stimulants, excessive use of it is dangerous. It first excites and then depresses; frequent oxygen intoxication will prematurely exhaust the individual's vitality and will surely tend to shorten his days. Such indulgence will make the cardiac beats most pathologically rapid and powerful; the blood will flow in excessive volume and strength and the collapse will be in reciprocal proportion. The ears sing in an "oxygen jag," as if one should hang head downward over a cliff; speech is hesitating, "ideas swarm, but it is hard to seize them."

Sir Edwin's proposal is amazingly unscientific in a scientist of so great reputation and it is most unsportsmanlike, especially in an Englishman the Britisher being nothing if not a lover of fair play in sport. What folly to declare nascent oxygen as natural an article of consumption as water! Pure oxygen is far from being such a thing; it is natural only to be breathed when it is diluted with several times its volume of nitrogen.

Pure oxygen has before been used in athletics, but all that kind of thing is altogether cheap and unprofitable and it has a yellow streak. Yes records have been broken by this means. They should not stand; they do not in the minds of the sporting aristocracy. And the reason why is that they are not tests of brawn and endurance under the inexorable conditions in which human life must ordinarily be lived. An oxygen drunk might make an untrained, undeveloped, soft muscled, ordinarily short winded specimen successful for the brief span of a given contest; but for all that he would be poorer, and not the really triumphant man. All competitions should be held under natural conditions, such as must be changed and coped with in nature. The only safe and sane way to breathe oxygen is in combination with nitrogen as it exists in the circumbient air, in the form to which, during the ages, human and all other life has become adapted. Normal living is ever "the right adjustment of internal relations to external relations."

After all, why should marathons be run, anyway, except for the glorious and sufficient purpose of announcing in the Athenian market place the victory at Marathon over the Persians? How utterly purposeless is today this terribly taxing race, which must for many a participant result in disease and in shortened existence.

## CUT OFF FOOT BY WIRELESS

Gulf Operator Told How to Perform Operation by Doctor on Ship 420 Miles Away.

New Orleans, La.—How a laborer on Swan Island, a lonely wireless station in the gulf, sustained a crushed foot; how the wireless operator on the island communicated with a ship 420 miles away, raised the surgeon and got him to explain the proper way to amputate, and how the operator's assistant performed the operation, is a story told by the manager of a big shipping firm. New Orleans physicians describe it as "surgery by wireless."

On Swan Island is a wireless station, one of the links in the United Fruit chain to the tropics. When a laborer hurt his foot in a tram car accident the wireless operator concluded an operation was imperative. There were no medical books at hand, and no one at the station ever had hacked at a fellow being. Then the operator had an "inspiration." He called a fellow craftsman on a ship passing 420 miles below into the Caribbean sea. The situation was explained to the ship's surgeon, and detail by detail he explained just how the amputation should be handled.

After the arteries had been tied and the wound dressed the patient recovered his senses and insisted on pressing at the wireless key to express his thanks. At last accounts he was getting well.

## ENGLAND HAS NEW RIFLE

Will Be Easier to Handle and More Effective Than Present Model.

London.—The British troops are to be armed with a new rifle. Ever since its introduction in 1903 the Lee-Enfield rifle, with which the British forces are now armed, has been the subject of fierce controversy. The shortening of the barrel was the point chiefly criticized, and as the rifle has not been able to hold its own against the longer weapon with which the territorials have been equipped the controversy has never died down.

The idea underlying the adoption of the short rifle was to have a weapon which would be easily handled by both mounted and dismounted troops. To suit the cavalry five inches was taken off the rifle and the reach of the infantry soldier with the bayonet was thus shortened. Attempts have been made to restore this lost advantage by the issue of a longer bayonet, but the developments of the modern high power cartridge have intensified the defects of the short barrel as regards fire efficiency. A longer barrel is necessary for accuracy and ease.

The barrel of the new rifle will not have the full five inches restored, but about one-half of that. A change of considerable importance will be made in the caliber, which in the new rifle will be .276 instead of .303.

An advantage in velocity is expected from this change, as the bullet will be lighter. The chamber of the new rifle being larger and the breech mechanism stronger the explosive to be used will possess very high power; and it is not improbable that the velocity will be 3,000 feet a second, as against 2,450 of the rifle and ammunition now in use. This would give Britain an advantage of 100 feet a second over the nearest rival, and with the alterations the bullet should never travel higher than the height of a man.

The principle of the aperture sight, which makes aiming partially automatic, has been accepted, and the loading also will be much quickened by the new methods of feeding cartridges into the chamber. The new rifle will be a few ounces heavier than the present Lee-Enfield. It is expected that trials will be made with it by selected troops this summer.

## BELGIAN GIRL IS DETECTIVE

How Her Wish to See Scotland Yard Was Gratified—Thanks Court for Kindness.

London.—A girl of fifteen, who, armed with a huge six-shooter, had traveled all the way from Antwerp for the avowed purpose of seeing Scotland Yard, was arraigned at the Bow street children's court charged with being in possession of money stolen abroad.

A woman detective of the National Vigilance association stated that she had met the prisoner at the Liverpool street station and had asked her in French whether she could be of any assistance. The prisoner, whose name is Madeline, had replied that she did not want any help, but that she had come to England to see her brother, who lived in Newcastle.

Asked for her brother's address she said she did not know it, but he would be waiting for her at Newcastle station. She said she had come to England for a fortnight, and her mother had given her money for the trip. She afterward confessed that she had stolen about 300 francs from a safe in her parents' house at Antwerp, and she had in her possession £5 10s in English money and some foreign coins. Asked what she did for a livelihood, the prisoner at first said she was an actress. She afterward stated that she was in a society connected with detective work, and thought she would like to see Scotland Yard. She wanted to know who the inspector at Scotland Yard was, and intimated that she was well able to protect herself. She was taken to the secretary of the National Vigilance association and afterward to Scotland Yard.

The magistrate sent the girl to a remand home for a week, in order that the police authorities at Antwerp might be communicated with. On this being interpreted to her, the prisoner, who seemed surprised at the kind way in which she was treated, smiled her thanks to the court.

## PLAN CHURCH "AD" CAMPAIGN

American Missions Will Spend \$50,000 For Newspaper Publicity in United States.

New York.—Fifty thousand dollars' worth of newspaper advertising space is to be purchased next fall by the American home missions council in order to present current social and religious problems fully and frankly to the people of the United States.

The money has been appropriated by the home missions council, composed of the 27 general boards engaged in national home mission work and the council of women for home missions, which has nine constituent women's boards, national in their scope, these organizations representing practically the entire Protestant home mission forces of America. The campaign is to be under the direction of Rev. Charles Steile of the bureau of social service of the Presbyterian church.

The campaign will begin early in the fall, culminating in "home mission week" from November 17 to 24. Committees will be organized in the 2,500 American cities having a population of 2,500 or more, these committees to become responsible for the campaigns in nearby towns and villages.

### CORK THE BOTTLE.

Oklahoma has been soaked, drenched and almost swamped by the bountiful moisture of the last two months. Over nearly the whole of the state the ground is saturated deep down in the sub-soil and now that fair weather seems to have come every farmer is rubbing his hands and looking forward with glee for bountiful crops this year.

Nature seems to have tried to give us her best and all the face of Oklahoma seems to ooze good promise and moisture. And right there is a little fly in the honey. The moisture is excellent now, but the spring wind will make short work of taking it out of the soil if the farmers do not at once "cork the bottle" that holds the invaluable elixir of farm crop life.

Let's "cork the bottle" while we still have the moisture. We have plenty of moisture now, but we have no assurance that we are going to continue to have it all during the year. Nature tried to teach us something by the drouth of the last two years and the lesson she tried to impress on us is to hold your moisture while you have it.

There will always be some dry periods during the crop season in Oklahoma. There will never be a time when we will have too much moisture all the year long. Any farm crop is hurt by having insufficient moisture at some period in its growth. The way to give crops moisture during dry periods is to store up moisture in the ground during the wet periods which can be used by the plants during the period of no rainfall. If there is one thing that I would like to be able to impress on every farmer and gardener in Oklahoma at this time it is that we should follow the advice of Prof. Jardine, of Kansas, and "put the lid on" our moisture supply while we have it.

We have just one way to do this. By cultivating the surface of the soil to prevent evaporation. Get out your section harrow and harrow every field that has been plowed and not planted. Harrow your wheat and oat fields. It won't hurt the crop and will help retain the moisture. Corn, milo, kafir and other cultivated crops can be harrowed until they are several inches high and you will be doing good cultivation at the same time that you are conserving your moisture. If your harrow is busy somewhere else you can use a disc set at sharp right angles and pulverize the surface in this way. The method of doing the work is not so important. The principal thing to keep in mind is to pulverize the surface and to do it now.

Where crops are already planted, surface cultivation should begin as soon as the top soil begins to dry. Hold your moisture. Lock the stable door before the horse is stolen. Cork the bottle.

Every commercial club, every banker, every business man and every farmer should join in one big movement to see that all possible moisture is held by surface cultivation. Let's take out some prosperity insurance while the rates are low.

Cork the bottle!

MARLE WOODSON.

### BASEBALL NOTES

The Boston Red Sox have released "Casey" Hageman, the former Denver pitcher, to the Jersey City Club. John Gansel's Rochester champions have come to life and are now making the International League teams behave.

Cheney, the former Louisville Pitcher, seems to be the only hurler with the Cubs able to produce winning results.

The United State League got a good start in Pittsburgh, the first game of the season drawing 7,000 spectators. Hugh Duffy is having a hard time trying to keep his Milwaukee Brewers up in the American association race. The Peoria champions of the Three League got away to a bad start this

season, losing the first six games.

Manager Frank Shaughnessy, of the Fort Wayne team, is leading the Central League batters with an average of .468.

Pitcher "Rube" Marquard is tossing the same kind of teasers that won him first place among the National League slab artists last season.

"Spike" Shannon, the former New York-Kansas City outfielder, is now clerking in a Kansas City hotel and declares he is out of baseball for good.

Before the season opened, how many followers of baseball would have picked the White Sox to polish the world's champions, and right on the champs' own lot at that?

With Lajoie out of the game the Cleveland team has found the going pretty tough. The Naps miss those swell bingles the big Frenchman is in the habit of putting over.

Now they say that Hank O'Day is a better manager than he was an umpire. No doubt that is true for according to the fans there never was a good umpire in the history of the game.

The Boston Red Sox made a run-getting record in a recent game with the St. Louis Browns, when nine run straight were scored by nine successive batsmen in one inning before anybody was put out.

The St. Louis Cardinals look a hundred per cent better when Roger Bresnahan is on the job. Then "Rajah" is again able to work behind the bat the Cards' percentage should rise like a thermometer in a boiler room.

### Baccalaureate Address.

The baccalaureate address by Mr. Murdough, principal of the Southern State Normal of Durant will be delivered in the auditorium of the normal this evening at 8:30. The senior class will receive their diplomas from President Briles. The class is composed of Nannie Henderson, Kate McKeown, Muriel Wright, Mrs. Effie Bray, A. C. Bray, Ray H. Palmer and William Buttram.

### NOTICE TO THE PUBLIC.

For the convenience of the public, the Evening News will hereafter be on sale at the Post-office News stand for the small sum of 2c. The same rate will prevail at the News office. This is less than the actual cost of the paper, and it is impossible to make the price any lower. The publishers would like to give it away, but every paper costs money to print, and if it is worth reading at all, the News is certainly worth the small sum asked for it.

for all kinds of coal. Our bins are full and we are equipped to execute your orders exactly as given and with little delay. The following prices will interest you:

Dewer Nut, \$4.50; Lump, \$5.50; Highest Grade McAlester Lump, \$6.50; all in ton lots.

Remember if you get 1500 lbs. of lump coal and 500 lbs. of slack for a ton you have really only 1500 lbs. of coal as the slack is worthless to you. We would not let you have slack if you wanted it as we need it for our boilers, so be sure and get our prices before you buy.

### The Comedy of Errors.

The Comedy of Errors, the second of the series of three plays to be given by the normal was given before a full house last night. The cast was a strong one and the play was well rendered even to the details. Grady Matthews and Frank McCain, the two Antipholuses and Longley Fentem and Glenn Hardin, the two Dromios played their parts exceedingly well. The young ladies, Miss Mollie Russell, Miss Mattie Cole, Miss Margaret Cameron, and Miss Retta Statler, were most excellent in their respective parts. The other members of the cast were Bonne Jones, Guy Fuller, George Fentem, Huey Howerton, Virgil Cottingham and Percy Barton. Each of these young men played their parts and deserve the many compliments extended them. The play was under the direction of Miss Spriggs and Mrs. Perkins and it must not be forgotten that much of the success of the play is due to their efforts and skill.

## W. O. W. ENCAMPMENT

ADA, AUGUST 2 AND 3

Another big thing is billed for Ada this summer. On August 2 and 3, the Woodmen of the World are going to put on a big encampment and celebration that will draw people to Ada from all over this part of the state.

A big feature of the program will be the making of 500 new choppers in one class.

Pontotoc county Woodmen are backed up in the movement by their brother choppers in Garvin, McClain, Hughes and Coal counties.

Read of their plans in the big two-page ad in today's paper.

### Revival Meeting at First M. E. Church

Despite the fact that there were a number of entertainments in the city last evening the crowd almost filled the church at the revival meeting now in progress. After a thirty minutes stirring song service led by Mr. Curry, and a solo by Rev. Carpenter, evangelist Law preached on "Excuses," the lesson being taken from the fourteenth chapter of St. Luke, "the parable of the great supper." He made plain the difference between excuse and reason. He said "that any man could give an excuse why he was not a christian but none could give a reason." He said that men were continually giving excuses such as, "I would be a Christian if it were not for the hypocrites in the church," and who can wonder that the termination of such a life should be marked with dying regrets and painful forebodings. He emphasized the fact that excuses would not alleviate the pain of a lost man or woman. At the conclusion of the service there were six professions. There will be services tonight at 7:45 and tomorrow afternoon there will be a great rally service for the children. All the children in the town and country are urged to be present at that service.

Mrs. R. W. Simpson and son went to Holdenville yesterday to meet his sister-in-law, Mrs. Carroll. She returned today.

## WORLD'S GREATEST OCEAN LINERS

Name	Date	Lgt.	Ton.
Great Eastern	1858	630 ft.	27,000
Britannic	1874	455 ft.	8,500
Campania	1893	600 ft.	18,000
Olympic	1910	882 ft.	45,324
Imperator	1912	900 ft.	50,000

Berlin, May 23.—A party of distinguished engineers, newspaper representatives and others left here today for Stettin, the guests of the Hamburg-American Steamship company to attend the launching of the company's new liner Imperator. The new vessel, which is larger than any craft afloat is to be launched tomorrow from the yards of the Vulcan Shipbuilding Company on the Elbe. The ship will probably be ready to make her first trans-Atlantic voyage early next winter.

The Imperator is designed to eclipse all previous records of ocean greyhounds for size and speed. She is to be about 20 feet longer than the Olympic and her sister ship, the ill-fated Titanic and will have a displacement exceeding those vessels by about 5,000 tons. The length of the Imperator over all will be 900 feet, and when complete and fully laden she will displace about 50,000 tons. There will be eleven decks on the new liner, and she will be fitted out in the most luxurious style.

The deck of the new liner will have the beam of Broadway, New York's leading thoroughfare, at its widest part—96 feet. Nine of her eleven decks will be above the water line, equal to the height of the largest apartment houses. If the Imperator were set up on end beside the cathedral of Cologne, the famous tower would come only to the second fun-

nel of the steamship. Nearly 2,000,000 feet of Oregon fir were used for her decks alone.

With so much space available features are possible that have never before been introduced. There will be a promenade deck nearly a quarter of a mile long, a great entertainment hall two stories high, holding 700 guests, a conversation room, a smoking room, a ladies' hall, a winter garden, a Ritz-Carlton restaurant, a reproduction of ancient Roman baths in bronze, marble and ivory, rathskeller, women's salons in different decorative periods and national styles, "universal" telephones, the biggest gymnasium yet, running track of tan bark, squash court, submarine signals and powerful air pumps to waft below currents of the purest air and afford equable temperature throughout.

The Imperator will, when completed, not only be the largest vessel in the world, but will in addition insure her passengers against the terrors of seasickness. This happy condition is to be brought about by the installation of the Frahn decks on board the new "Goliath of the Ocean" a device that reduces the motion of a ship to a minimum. It has been tried out by the Hamburg-American line on a small ship and, so it is averred, has reduced the oscillation in heavy weather from 63 to 3 degrees.

The new liner will not be a fast boat, being built more for solid comfort than a great speed. Her time across the Atlantic will be in the neighborhood of seven days. Her engines will be of the reciprocating type.

It goes without saying that the company is preparing to equip the Imperator with a sufficient number of life boats to accommodate all of the passengers and crew, numbering altogether about 5,000 persons. The most wonderful Marconi apparatus ever set up at sea will be installed on the vessel, the unusual height of her masts making it possible to receive or transmit messages across the broad expanse of the Atlantic ocean. It is expected that she will always be in direct communication with either Europe or America.

## SENATOR MORGAN'S FIGHT FOR THE ISTHMIAN CANAL

Washington, D. C., May 22.—At a meeting of the executive officers of the Southern Commercial Congress today it was decided to have the 1913 Annual Convention coincide with the opening of the Panama Canal.

The 1913 convention of the Congress will be held in Mobile, Ala., and the Chamber of Commerce of that city is outlining plans which it would like to see carried through during the convention, has asked that the life and services of the late Senator John T. Morgan be particularly recognized. Senator Morgan for several decades was the most persistent American statesman advocating an isthmian Canal. He died a few years after the final steps regarding the building of the Panama Canal had been taken by the United States.

The executive officers also decided that its great 1913 convention should use the completion of the Panama Canal as a means of impressing upon the nation the importance of Southern ports viewed from the standpoint of greater commerce yet to be made possible through the Canal.

The commercial and historic will be blended in the celebration; for Mobile has been under five flags, and the vicinity has its place in American history from the year 1540, when De Soto fought the battle of Maubila, near the river above Mobile. The city has been under French, British, Spanish, Confederate and United States flags.

## Notes From the Labor World.

Carpenters in Japan receive 41 cents a day.

Masons in Arabia earn 35 cents to 50 cents a day.

The monthly wage of carpenters in Athens, Greece, is \$15.45.

The toy factories of Nuremberg, Germany, employ twelve thousand persons.

The Persian rug maker averages a square foot each twenty-three days of work.

Sixty per cent of the adult workers of Great Britain receive less than \$7.50 a week.

The first recorded strike in the United States was that of the journeymen bakers of New York in 1711.

During the ten years from 1900 to 1910 the income of the Unions in Germany was almost 64,000,000 marks.

Shepherds in Russia do not receive more than 10 to 20 cents a day. The pay is in supplies required for their homes.

Every drug clerk in Fresno, Calif., with the exception of one, is a member of the Drug Clerks' Association of California.

The working hours of the members of the Watch Case Engravers' International Union have been reduced to forty a week.

Recent statistics show that there are now 9,500,000 wage earning women in Germany, an increase of 57 per cent during the last twelve years.

The largest representation of women in industrial pursuits in Germany is in the clothing and allied trades, in which 1,562,000 are employed.

Moving picture operators in Berlin, German cities range from \$4.76 to a week, while operators in the smaller German cities range from \$4.76 to \$7.14 a week.

During the quarter ending March 31, eight new lodges were organized and several reorganized by the Brotherhood of Railway Carmen. The organization now has 552 local lodges with a membership of approximately 33,000 and still growing.

The Journeymen Stonecutters' Union at San Francisco has entered into an agreement with the contractors whereby an advance in wages of 60 cents a day will become effective on October 1. The new agreement will hold good until January 1, 1916.

The governor of Arizona has approved a bill passed by the legislature of that state, prohibiting exactions from workmen as the price of employment. The new law carefully defines the rates that may be legally bargained for finding employment and provides punishment for its violation.

There will be held in Milan from May 27 to 31 the first International Technical congress for the prevention of accidents and injury to laborers and for industrial hygiene. This congress will consider technical means and safety devices tending to protect the life and limb of the laborer, as well as the means and methods for improving the hygienic conditions of various industries.

## My Worst Blunder

FAMOUS "BONEHEAD" PLAYS ON MAJOR LEAGUE DIAMONDS

Explained by Leading Baseball Players to HUGH S. FULLERTON

By "WILD BILL" DONOVAN,

Veteran Pitcher Detroit Tigers, Who is Considered One of the Best of the Fast Ball Hurlers the Game Has Ever Known.

The biggest mistake I ever made never can be explained. It is one of those things that will happen in baseball, no matter how carefully a man may figure out a play or how well he may pull it off. It was the toughest thing that ever happened to me in baseball and I always will believe it was the play that beat us out of a world's championship. Anyhow, it kept us from winning the first world's championship game we ever were in, and turned the whole series against us. The fact that I did exactly what I wanted to do, and then lost the game by it, doesn't make it feel any easier.

It was the first game of our first world's series against the Cubs, which was the greatest game, in many respects, I ever saw or took part in. It was also the most heart-breaking finish that I ever experienced during my

Bill Donovan.

career. The teams did not know each other very well, and both were near their best, all primed up, and I never was better or had better control. You probably will recall the situation in the ninth inning. We had the Cubs 3 to 1 when they came to bat, and I looked as if the game was over. The strain was telling on every man in the game and I think I never saw as much excitement on the field and in the stands. They got men at first and second with only one out, and the next batter hit a slow bouncer down to Bill Coughlin on third. Bill fumbled the ball just long enough to let all the runners land in safety. The next man went out on a fly ball that scored the runner from third and allowed the others to move up, but I never felt more confident. The game ought to have been over right there, and yet with Joe Tinker coming to bat I didn't worry, as I had fooled Joe the other three times at bat, and it looked comfortable. Chance thought Tinker couldn't hit me and he sent Del Howard to bat in his place. I didn't know much about Howard, but figured that speed would stop him, and I shot two fast ones over just as hard as I could. He took them both and they both were called strikes. Schmidt, who was catching, walked half way down to the pitcher's slab and asked me what I was going to pitch. With only one ball left to clinch it, I suppose he thought it best to make sure that no signal could go wrong. I told him I was going to try to break a low curve in close around Howard's knees. I figured he would be laying for a fast high one outside.

If I had been a dead shot with a rifle I could not have shot the ball more accurately. The curve broke perfectly, went in and just across Howard's knees. I thought it was over, but in some way the ball got past Charlie, broke through his glove, and of course the tying run came over, and we fought it out to a tie.

I have seen this written up as a wild pitch, or as a badly pitched ball, but I give you my word that I never placed a ball better in my life. It was merely an accident. Such a ball wouldn't get past Schmidt once in a million years, and no one ever will know why it got past that time. (Copyright, 1912, by W. G. Chapman.)

Politics and Politicians.

The Socialist Party has grown less rapidly in the Southern States than in any other section of the country.

A movement has been started to make George Ade, the humorist and playwright, the Republican candidate for governor of Indiana.

Knut Nelson of Minnesota is undecided as to whether he will be a candidate to succeed himself in the United States senate.

Three special trains have been chartered to carry the "Underwood for President" boomers from Alabama to the democratic national convention.

James Hamilton Lewis, democratic candidate for United States senator from Illinois, is being urged for temporary chairman of the democratic national convention.

Colorado democrats have delegated Mrs. Anna B. Pitzer to cast the vote of their state delegation for her brother-in-law, Champ Clark, at the Baltimore convention.

The first state-wide primaries in Maine will be held next month, when both parties will nominate candidates for governor and United States senator.

The national Prohibition convention which is to meet the second week in July at Atlantic City, will have a total of 1,484 delegates and an equal number of alternates.

Massachusetts democrats will urge the selection of Mayor Fitzgerald of Boston to serve as either permanent or temporary chairman of the national convention at Baltimore.

Dr. Harry Lane, the democratic candidate for United States senator from Oregon, is a grandson of General Joseph Lane, who was Oregon's first territorial governor, one of her first senators and a candidate for vice president on the Breckenridge ticket in 1860.

In the event of Theodore Roosevelt receiving the nomination for President, friends of William Flinn, of Pittsburg, now the recognized leader of the republican party in Pennsylvania, declare that he will be a candidate for chairman of the republican National committee.

The National convention of socialists at Indianapolis has called attention to the rapid growth of this party and its increasing influence in American politics. In 1892, when the Socialists first appeared on the national ticket, their presidential candidate polled 20,000 votes. In 1908 their vote was just under 500,000. This year a vote of over 2,000,000 is prophesied, or about one-seventh of the ballots of the country.

Women are to vote in the presidential contest of this year in the states of California, Colorado, Washington, Wyoming and Utah. The republican presidential plurality in 1908 in California was 86,906, in Washington 47,351, in Wyoming 5,928, in Idaho 16,459 and in Utah 18,414, while Bryan carried Colorado by 2,944. The republican national campaigners are arranging to employ a staff of women political speakers for

these six states this fall, and it is said the democratic national campaigners contemplate a similar step.

Separating Lady's Finger Tips.

Many boys pride themselves on their muscular strength. Let a girl place the tips of her forefingers together, keeping her elbows on a level with her shoulders, and challenge any boy to take hold of her wrists and separate them by a steady pull. Unless she be unusually weak or he be very strong, he will probably fail.—Woman's World.

### Pawnee Shaft Unveiled.

Great Bend, Kan., May 24.—The Pawnee Rock monument, in memory of the pioneers of the Santa Fe trail, was unveiled today with impressive exercises conducted in the presence of large delegations representing the Woman's Kansas Day Club, the Daughters of the American Revolution, the State Federation of Women's Clubs and various other organizations which aided in raising the money for the memorial and bringing the project to a successful conclusion.

Pawnee Rock is one of the most historic landmarks in the west. It is related that the rock took its name from a great three days' battle between the Pawnees and their enemies, the Plains Indians. Among the latter were Cheyennes, Sioux, Kiowas and Comanches. The Pawnees all fell, but they made their conquerors pay heavily.

The memorial was not erected to commemorate the Indian battle, however, but in memory of the great tide of emigrants which came from the East and wended their way over the near-by Santa Fe trail on their journey to the great West. The rock itself is fifty feet in height, and the granite shaft, which is imbedded in the rock, rises twenty-eight feet. The monument can be seen many miles on a clear day.

A buffalo head and an Indian head are carved upon the shaft, and there are a number of inscriptions. The inscription on the face of the monument reads:

Erected by  
Woman's Kansas Day Club,  
Daughters of the American Revolution  
Women's Relief Corps,  
State Federation of Women's Clubs,

### Oklahoma Editors at Muskogee.

Muskogee, Okla., May 24.—Makers of Oklahoma newspapers rounded up here in force today for the twenty-first annual meeting of the State Press Association. An invocation by Bishop Thurston opened the proceedings this morning. Other features of the forenoon program were addresses of welcome by Mayor Miller and President Spaulding of the Muskogee Commercial Club, a response for the visitors by John Golob of Guthrie and the annual address of Horace Shepard of Altus, president of the association. The afternoon session was given over to a cost congress. Tomorrow morning Bishop Hoss, of the M. E. church, South, will address the editors on "The Moral Influence of Newspapers."

## WASHINGTON STATE FOR COMMISSION FORM

Tacoma, Wash., May 24.—A commission form of government, with commissioners (from each of eight districts) and the governor elected at large is proposed to be applied to the state of Washington by H. J. Snively, state leader in the democratic party twenty-seven years and once candidate for governor.

"By having the state divided into eight districts it would be possible for voters to have something like personal acquaintance with men for whom they vote," said Snively.

"The governor and eight commissioners would take the place of the present executive and legislative bodies. The legislature would be abolished and commissioners would make laws just as a commission passes an ordinance in any city in which that form of government has been adopted. The commission of eight would also perform the duties of a public service commission, industrial insurance commission, board of control and other legislative and semi-executive bodies now appointed by the governor."

Many other democrats and others indorse the Snively plan as a means of reducing the number of cumbersome laws and rapidly growing state expenses.

## TITANIC OFFICIALS WILL BE REBUKED

Washington, May 23.—The report of the senate committee on commerce on the investigation of the Titanic disaster, embodying a severe condemnation of the conditions under which the giant vessel was allowed to steam to her doom among icebergs off the New Foundland banks and recommending remedial legislation, will be presented to the senate next Tuesday.

All day the committee discussed the conclusions submitted by the subcommittee which took the testimony in the case and unanimously adopted its report. The report will in all probability criticize the Titanic commander and crew for the way in which the vessel was handled just preceding the collision with iceberg and the lack of discipline displayed afterwards; the way in which the White Star line officials handled the news and the lack of lifeboats and other equipment.

The Carpathia's commander, Capt. Rostron, who went to the rescue of the Titanic will be warmly praised. It is believed. The report will be followed by the introduction of measures by William Alden Smith, chairman of the committee, to carry out the conclusions of the committee. Among the reforms contemplated are an inhibition against the firing of rocket signals at sea except in case of distress, the equipment of all ocean passenger craft with ample lifeboats and other equipment, the furnishing of searchlights to ocean vessels, the compulsory use of binoculars by the lookouts, the constant maintenance of wireless telegraph communication and other steps that may be effective in the way of reforms, either through legislation by congress or by international agreement.

It is possible that a resolution of thanks will be introduced in recognition of the splendid work of Capt. Rostron in rescuing so many Americans.

## POLITICAL ACTIVITY IN NEW JERSEY

Newark, N. J., May 23.—New Jersey became the battlefield in National politics today when President Taft and Theodore Roosevelt moved into the state to battle for twenty-eight representatives who will be sent to the Chicago convention.

Senator La Follette began his campaign last night.

Mr. Roosevelt opened his engagement in the northern part of the state and will reach Trenton tonight.

President Taft will begin his fight in an address at Camden tonight.

Gov. Wilson is the only candidate named on the democratic primary ballots, but he is opposed by a strong anti-Wilson organization which is trying to elect uninstructed delegates.

The primaries are next Tuesday.

Gov. Wilson announced several days ago that he would make no public appeal for the primary votes of the democrats of his own state.

The Wilson organization has a number of speakers addressing meetings in the cities and small towns of the state.

Col. Roosevelt will make his last speech tonight at Jersey City.

## Motherhood

The highest point of woman's happiness is reached only through motherhood, in the clasping of her child within her arms. Yet the mother-to-be is often fearful of nature's ordeal and shrinks from the suffering incident to its consummation. But for nature's ills and discomforts nature provides remedies, and in Mother's Friend is to be found a medicine of great value to every expectant mother. It is an emulsion for external application, composed of ingredients which act with beneficial and soothing effect on those portions of the system involved. It is intended to prepare the system for the crisis, and thus relieve, in great part, the suffering through which the mother usually passes. The regular use of Mother's Friend will repay any mother in the comfort it affords before, and the helpful restoration to health and strength it brings about after baby comes. Mother's Friend is for sale at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature.

# EMERGENCY SALE

THIS is a sale such as Ada has never seen. We've been trying real hard to prevent it, but we simply must hold this sale and unload our great new stock of fine Spring merchandise at prices such as Ada and vicinity have never seen. You know this has been a most backward season--weather has been bad, business bad, and conditions not exactly right. We prepared for an immense Spring trade--we bought heavily and stocked our store with the best and choicest goods in the leading markets of America--in fact, we bought here for Ada the most attractive stock of stylish, well made goods that has ever been assembled under one roof in this city.

## NOW THIS FINE STOCK MUST GO, REGARDLESS OF COST

Every article in this store will be marked down from 1-3 to 1-2. This is a saving opportunity that no one should miss, no matter how far you live away from Ada, take a day off, come to this store; select the choicest and finest goods made, and all you need pay is 1-2 to 1-3 of its real worth. It doesn't matter whether you need goods now or not, come anyway. When you see the character of the merchandise we offer, and the unusually low prices, you'll simply have to buy--such fine goods were never sold at prices like this. Read the items listed below, they're not exaggerated one cent. Everything exactly as represented. REMEMBER THIS SALE OPENS ON

# SATURDAY, MAY 25th, 1912

AND CONTINUES FOR 15 DAYS ONLY. FIRST COME, FIRST SERVED. ARRANGE TO ATTEND THIS SALE
